

CILEX Health & Safety Statement of Intent

As an organisation, CILEX is strongly committed to ensuring that our staff are fully conversant with health and safety legislation and that we proactively endeavour to achieve regulatory best practice guidance.

We fully integrate health and safety in the management of all aspects of our business in such a way that all activities are considered with a perspective of prevention of all types of accidents and the protection of the well-being of all our employees and others that are affected by what we do.

This aspiration further includes the provision and maintenance of a healthy, safe, inspiring working environment that minimises the risks to employees, contractors, visitors, and others who may be affected by our activities.

To ensure that we fulfil these health and safety expectations, we ensure that our employees are fully competent to undertake all necessary tasks, and that adequate resource is made available for all works which we undertake.

We ensure that any consultants, contractors, partners, and others working on our behalf have sufficient information and training and are properly equipped to execute safely their tasks. Furthermore, we regard health and safety management as an important consideration in relevant supplier and contractor selection and ensure that this is rigorously monitored throughout their engagement with us. Before we engage the services of any contractor for major project or repair work, we request site of their Health and Safety Policies and Risk Assessments as well as proof of requisite training and any other relevant Health and Safety documentation.

As the Director with responsibility for Health & Safety, I am strongly committed to ensuring that our employees effectively implement our health and safety management system at all times and that we engage and inspire everyone to continuously improve on these standards.
